Mr. Gooocruter
Director of Recruitment
Google
1600 Amphitheatre Parkway
Mountain View, CA 94043

DEAR GOOCRUITER,

I developed my passion for computers as I was a child. Fascinated by every intricate component, my curiosity ran wild. This fascination is what guided me to pursue a bachelor's in computer engineering at the University of South Carolina. Google has been a faithful companion in my journey through the exploration of technology. It amazes me that google once started in a rented garage and inspires me to join the efforts to support the company as it continues to grow throughout the years.

My interest, specifically for this company stems from the fact that google cares for their workers and take time to ensure their wellbeing. By working in retail, I have developed numerous soft skills, as I was required to clearly communicate with customers to their satisfaction. Furthermore, I am a member of the cybersecurity club where we learn about different methods and tools.

Although I am an undergraduate student, I have developed skills in computer software in numerous computer science classes. I am also in the freshman council of the National Society of Black Engineers where I play an important leadership role. Additionally, I am a diligent work which is shown by my participation in the Capstone Scholars program.

I would like to discuss my opportunities at Google. The best time to reach out to me for an appointment would be between 2pm and 7pm on any day at (864)-419-7880. Also, feel free to leave a voice message so I can return the call.

Thank you for using your time to look at my resume. I look forward to meeting with you!

Sincerely,

Keshawn Blakely
