Ryan has been studying all week for his upcoming business exam and he currently has a C in the class and so he has to do good.
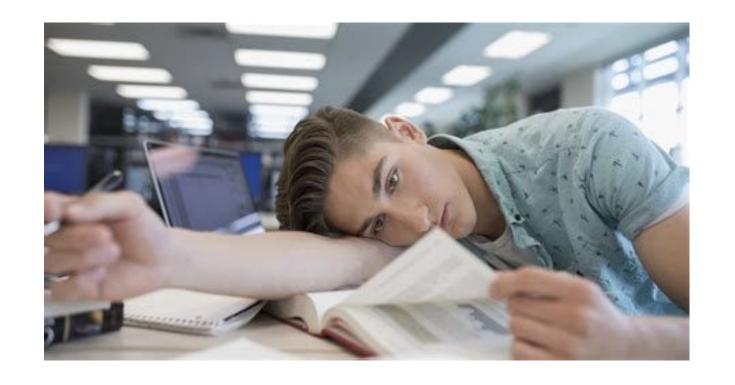

Ryan has been stressed for days over this test and he tends to lose track of time trying to prepare himself for it.

After another day at class, one of Ryan's friends told him about the student scheduler app that has saved her life many times.
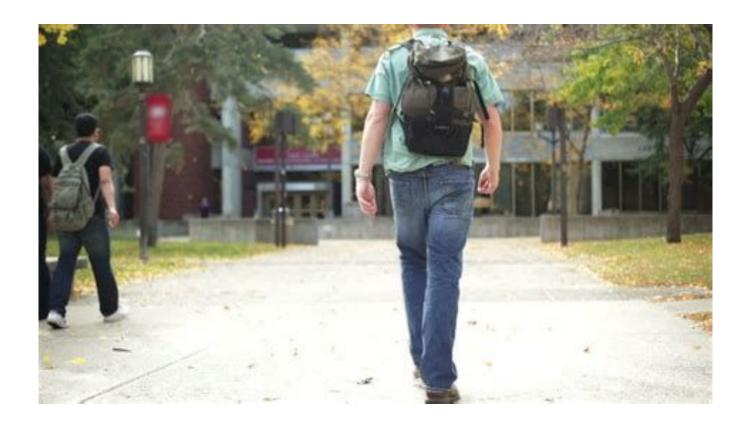

Ryan goes home and downloads the app to his phone and creates his account. Then Ryan schedules the times for all of his classes.

Once again, Ryan loses time studying for his exam and doesn't realize his Exam is in 10 minutes.

Thankfully, the Student scheduler app alerts Ryan about his exam in 10 minutes and there is heavier traffic than usual, so there's going to be a hard time crossing the streets.

Ryan uses the shortcut feature on the app to find a quick way to class and he arrives 3 minutes early for the exam.

Ryan takes his exam and feels great because he had plenty of time to study and thanks to the Student Scheduler, he will never be late to another class again.
