Problem Statement

Our users are frustrated because they often miss out on important material due to their lack of time management. Our solution should provide users with a way to easily manage their time by alerting them when class is coming up.

Who is experiencing the problem?

College Students with bad time management and need to promptly get to class

What is the Problem?

Students missing class due to their lack of time management

Where does the problem present itself?

Typically during long periods of time in between students' classes.

Why does it matter?

Missing classes leads to underachievement and stress
